- Attachment the Brother machine to the electrical plug and turn the machine power on.

For Wireless Network Users:

Fitting the Brother machine to the electrical plug and turn the machine power on. Then, at that point, you should arrangement your machine on the organization. For more data on the best way to arrangement the machine on the organization, if it's not too much trouble, allude to the Quick Setup Guide or Network User's Guide for your machine. The most recent Quick Setup Guide or Network User's Guide is accessible in the Manuals area.

- Snap on the Apple Menu and pick System Preferences.
- Apple Menu
- Snap on the Print and Fax, Print and Scan or Printers and Scanners symbol.

- Symbol Select
- Snap on + button.
- Menu
- Snap on Default. Pick your Brother machine from Printer Name list.
- Affirm that the right machine is recorded for Print Using or Use. Also, click on Add button.

For the CUPS Driver:

- Ensure that XXXXXXXX + CUPS is recorded for Print Using or Use. (Where XXXXXXXX is the printer model name.)
- For PostScript Driver (not accessible for all models):

For AirPrint viable models:

In the event that the AirPrint driver is chosen, you won't have the full usefulness of the printer driver. All things being equal, we suggest that you pick the CUPS Driver, as definite above, for the most over the top total usefulness.
